Creative People – A platform of creativity

Concept description:

The idea is to have a place, where different creative projects are being developed. Every project is developing their own things, ideas, but there should be at some points sharing of the outcome, what have been done. Figure 1 shows how the projects ideas are evolving around the creative people ideas (e.g. like satellites) and feeding the core with information and ideas.

It should be as well easy to go from one project to another, to exchange. Figure 2 displays the concept.

- Example: we have a flat, with three rooms, and a living room. Each room has its own theme/project (photography, high tech, handcraft, street art, graphic design…). The living room is the place to display and share the outcome of every projects, and simply a place to meet.

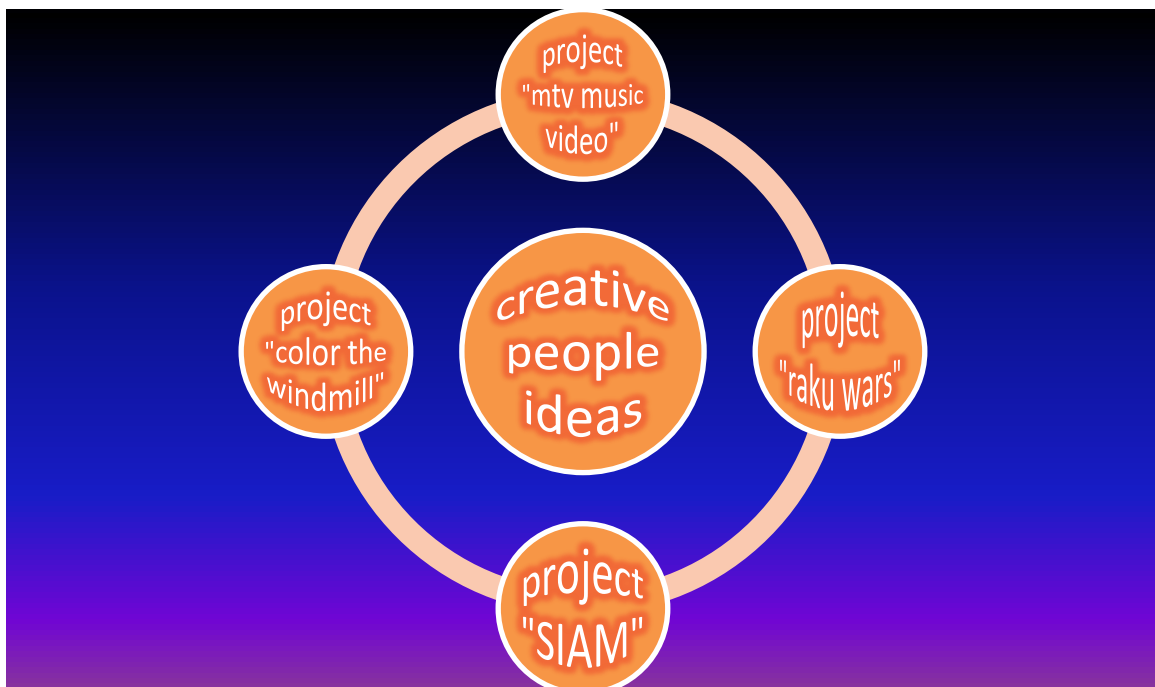

figure 1 independent EXAMPLE projects share their ideas in one common place

Interesting research findings: Definition of **concept**
In metaphysics, and especially ontology, a concept is a fundamental category of existence.
In contemporary philosophy, there are at least three prevailing ways to understand what a concept is:
- Concepts as mental representations, where concepts are entities that exist in the brain.
- Concepts as abilities, where concepts are abilities peculiar to cognitive agents.
- Concepts as abstract objects, where objects are the constituents of propositions that mediate between thought, language, and referents.
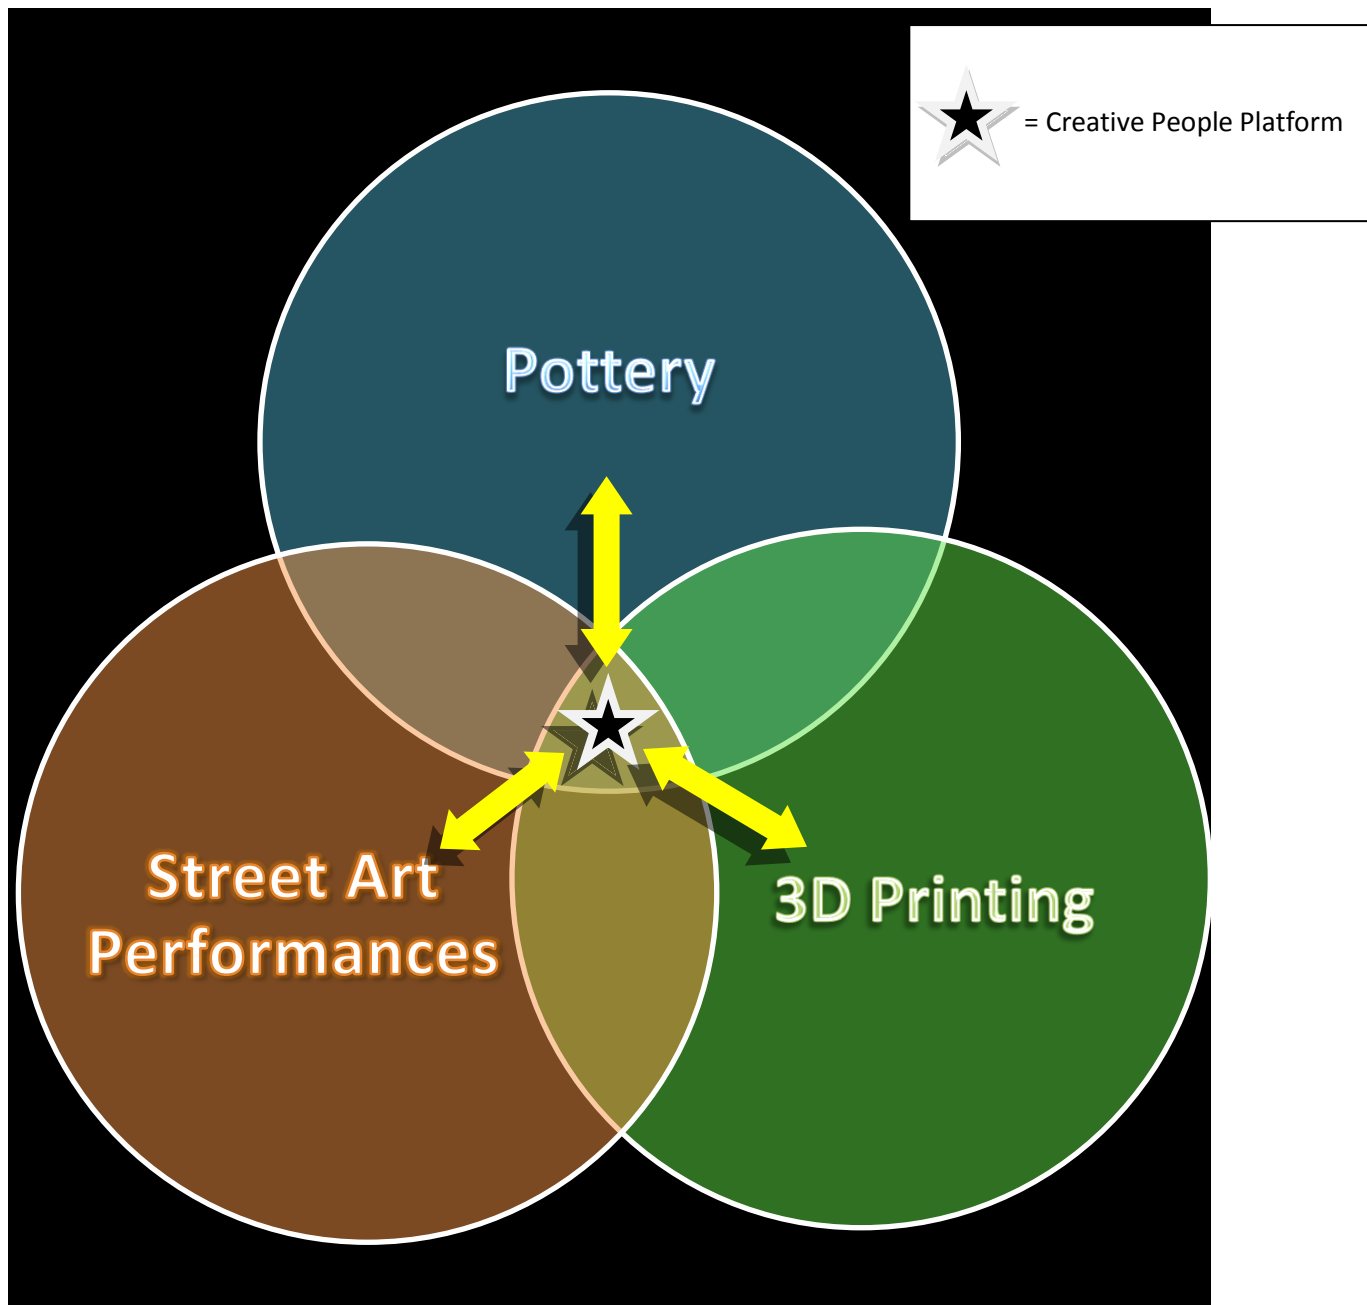

(Wikipedia)
figure 2 you can easily move from one field of creativity to another since every field has an area that is common, here depicted are only EXAMPLES for fields of creativity

Definitions:

Creativity refers to the phenomenon whereby something new is created which has some kind of subjective value (such as an idea, a joke, a literary work, a painting or musical composition, a solution, an invention, an IT-application, etc.). It is also the qualitative impetus behind any given act of creation, and it is generally perceived to be associated with intelligence and cognition. (see also Wikipedia)

Field of creativity can be the above mentioned new creation with subjective value, but in a more wider sense. An idea, a joke, a literary work, a painting, a composition, a solution, an invention are the elements. Put together they constitute a field of creativity.

Purpose of Creative People

The purpose is to support and push every kind of creativity (performances, enterprises, handcrafts, projects, classic art disciplines) to a high level.

It is a platform where people come meet, discuss, play and start something new.

Our Mission statement is: No Art in Bremerhaven! (Don't ask why, just do it!)

There is no such thing as a big alternative scene in Bremerhaven. Art is not represented widely. These are the facts. Now let's create something! Focus on YOUR goals, not of others, of other cities, of other countries. We are the makers! If something is not there, make it. If something doesn't function, rethink your objectives. If you're hopeless, invent hope!

People make the organization, not vice versa.

The focus is on the people and what drives them. It is important what they want. Let them speak first in front of the people and then the organization.

Passion in every form is the commitment of our participants.

Commitment comes in different forms. It always has something to do with "suffering", making sacrifices or simply setting priorities. If you're sacrifice is money, so be it. If you're sacrifice is time, that's okay. It you're sacrifice is expertise, you're right on place.

We want people like us. Highly motivated and urging to create something together because one can achieve his or her dreams not alone.
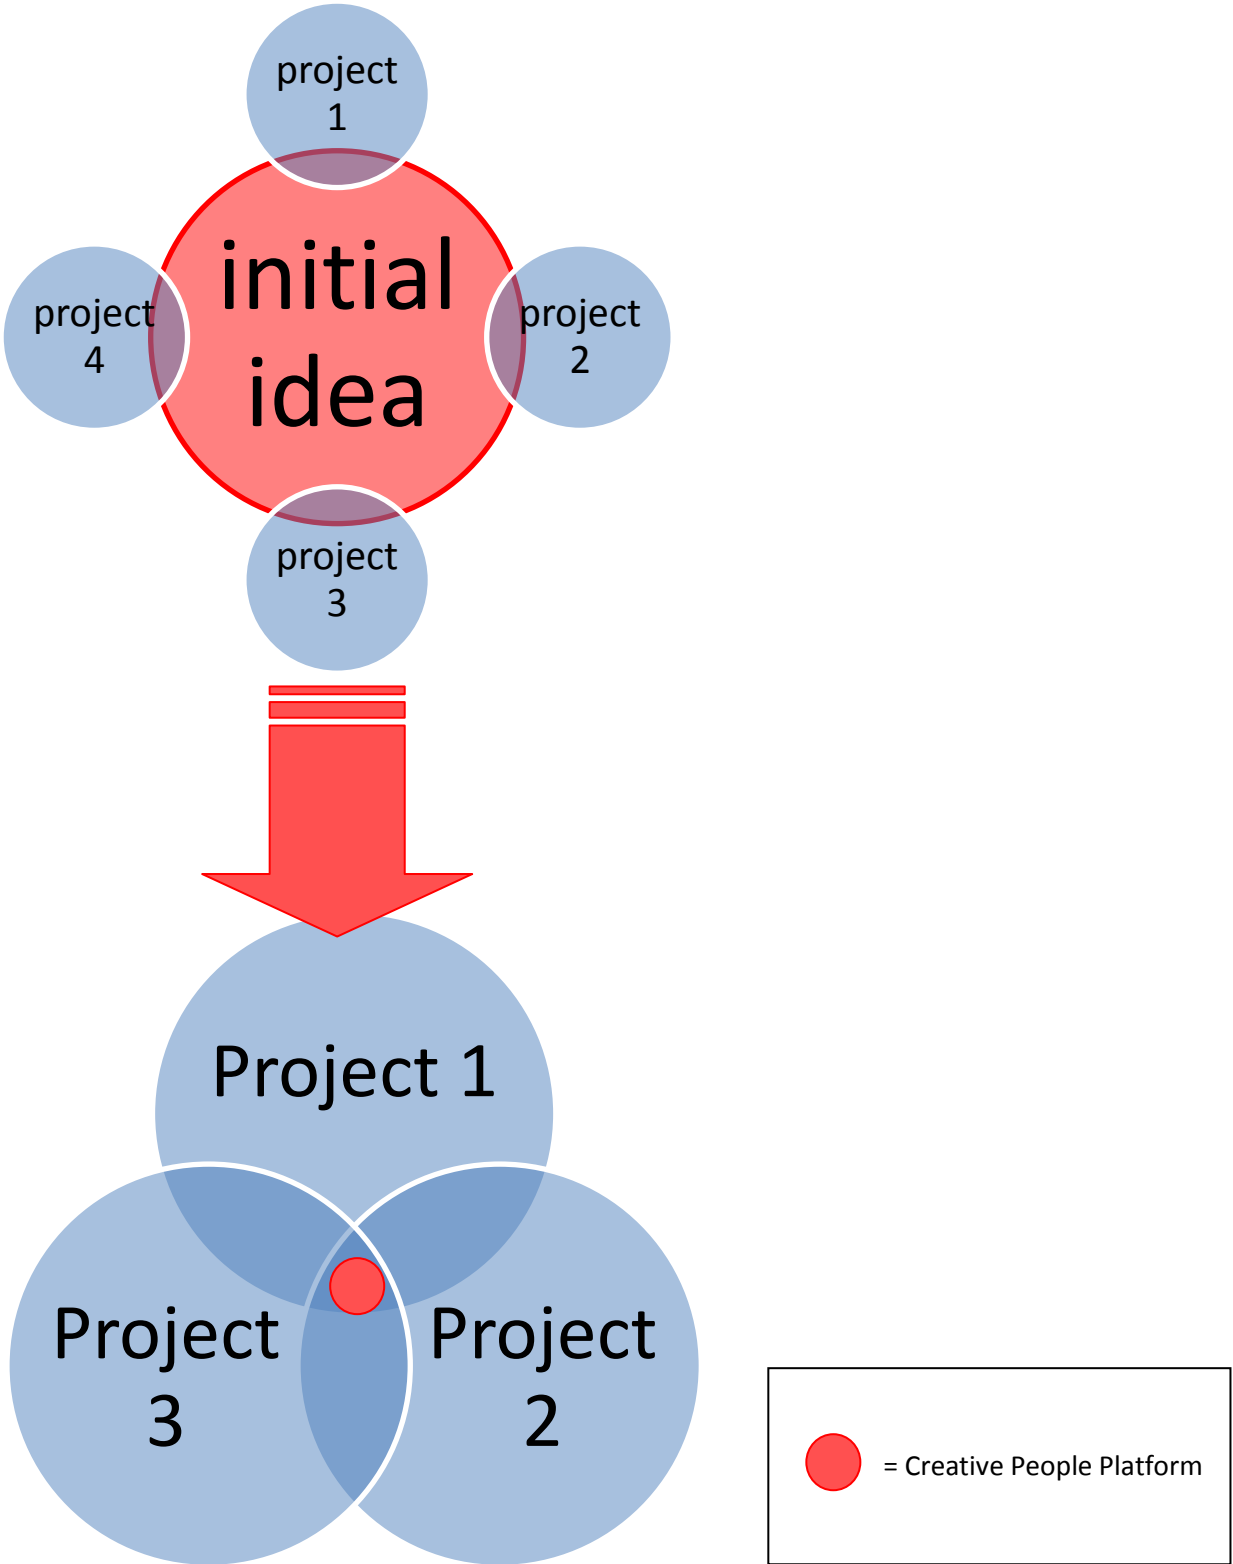

Organization Chart

The organizational structure arises in each project and is closely connected to the form of the project itself. It happens to be. After some time though, tasks and responsibilities will be written down as every project will eventually have tasks that our not very popular, so these must be spread equally. The motto is everyone does what he likes best plus one obligatory task. Stay fair!

Further explanatory thoughts:

Development of Creative People over time

In the beginning the central committee (or: creative people platform) will be most important. But after a time the projects itself will gain priority. Some projects initiated in the beginning might not be existent anymore. The idea is expressed in the following concept drawing:

Creative people and project organization

In figure 3 it is displayed who the creative people are.

figure 3 The creative people organization consists of persons with different fields of creativity

In the following it is shown how people can switch to other projects and how each project will be organized differently according to what people like and do best. (fig. 4 to 6)
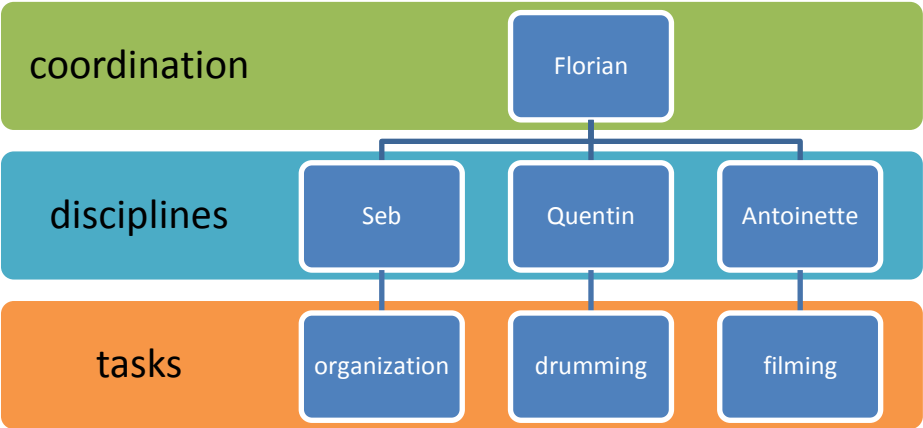

Project Drum Flash
